

NEOTION demonstrates voice recognition with NEOHOME

NEOTION goes a step ahead in adding voice recognition technology to its end-to-end smart home solution

Aubagne, France – September, 15th, 2017 – NEOTION invites you to come and see a live smart home demo including voice recognition combined with home automation capabilities available in its Neohome solution as a first step toward a future-driven AI solution.

Artificial intelligence and voice control will drastically transform the way we live. Embedding voice recognition is an easy way to simplify daily home monitoring and converts smart home into a solution accessible by everyone whilst creating value in everyday life.

NEOTION reinforces its partnership with leaders in smart home industry developing voice recognition by focusing on one of the main concerns when it comes to data collection: protecting privacy. Opting for private cloud-based solution compare to solutions already on the market, Neohome ensures the end-users to protect their private life and property as they are innocently asking for information or action to their vocal assistant.

All the corporate actors including operators must be confident in launching new smart home services in compliancy with the latest General Data Protection Regulation (GDPR) of the European Union. Neohome ensures its customers that data processed alongside the overall ecosystem are protected.

Neohome is an end-to-end solution tailored for operators and telco enabling them to transform Digital Home into a profit center: a flexible OPEX-based relying on a ready-to-deploy solution for a faster time to market and a scalable and fully customizable cloud-based services platform.

Neohome enables operators to choose among a range of home automation hubs such as a complete and full integrated stand-alone gateway, an USB stick as an add-on to deployed Internet routers or an all-in-one camera and/or voice assistant devices, easily configurable and managed by a cross-mobile smart App, securely connected to a private cloud-based platform and a wide range of connected sensors.

Feel free to visit NEOTION booth at IBC, Hall 5 Stand B53, for a live demo.

About NEOTION

NEOTION is a French high-tech company established in January 2000 and currently employing over 100 people.
